

New Game Project

One-page repo summary generated from project evidence

WHAT IT IS

New Game Project is a Godot 4.6 first-person shooter prototype. Repo evidence shows a playable FPS character, weapon resources, combat loops, HUD, and test/demo scenes rather than a finished shipping game.

WHO IT IS FOR

Primary user/persona: Not found in repo.

WHAT IT DOES

- Moves a first-person character with mouse look, jump, and captured cursor controls.
- Lets the player switch among M4MOD1, DD4X1, M45, and MosinNagent weapon resources.
- Handles firing, reload, ammo reserve tracking, auto-fire flags, and equip/unequip animations.
- Casts camera-aligned ray hits for hitscan weapons and applies damage to nodes in the Target group.
- Updates HUD labels for current weapon, ammo, and weapon stack through signals.
- Plays muzzle flash and procedural recoil through dedicated recoil and flash nodes/scenes.
- Includes a PDA-style notification panel scene/script with slide-in, audio, and auto-dismiss behavior.

HOW IT WORKS

- project.godot starts Sences/main.tscn, defines the input map, and autoloads addons/godot_mcp/game_bridge/mcp_game_bridge.gd as MCPGameBridge on port 6551.
- Sences/main.tscn assembles the world by instantiating FPS_Character.tscn, TestDemo.tscn, and a box object under a root Node3D.
- character_body_3d.gd reads input, moves the CharacterBody3D, rotates the camera, and recovers recoil over time.
- weapon_manager.gd loads Weapon_Resource data, queues weapon animations, raycasts from camera to target point, and triggers muzzle flash/recoil.
- HUD.gd listens to weaponChanged, updateAmmo, and updateWeaponStack to refresh UI. Notification manager/global queue service: Not found in repo; only NotificationPanel.gd is present.

HOW TO RUN

1. Open D:\Godot\Test\new-game-project\project.godot in Godot 4.6. Exact editor patch version is Not found in repo.
2. Run the configured main scene, Sences/main.tscn.
3. Use WASD + mouse to move/look, Space to jump, LMB to shoot, R to reload, 1/2 to switch, and Esc to release the cursor.
